Universal Installer Remote Usage Guide

Citrix XenApp Users

Users of Citrix should install 3 software packages:

1. The standard Universal Installer should be installed on the server.
 - a. For 32-bit applications:
www.epadsupport.com/downloads/UI12.3R12200_setup.exe
 - b. For 64-bit applications:
www.epadsupport.com/downloads/UI12.3.R12203_x64_setup.exe
2. The client Universal Installer should be installed on each client PC connected to the server.
 - a. For 32-bit or 64-bit Operating Systems:
www.epadsupport.com/downloads/UI12.0.R12011_Client_setup.exe
3. If you are using IntegriSign Desktop, it should be installed on the server.

Important Installation Notes:

- **Citrix Receiver on the Client PC:** Please install the Citrix Receiver component prior to installing the client driver.
- **Citrix Client PCs:** Universal Installer 12.3 Client Support software is to be installed only on client PCs in a Citrix network environment.
